DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to a method of load balancing, classified in class 718, subclass 105.
 - II. Claims 10-23, drawn to a method of identifying failure to a public network and identifying alternate path in response to failure, classified in class 714, subclass 2/25.

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as balancing a load to allow components to perform at optimum levels. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Gregory Schivley on October 5, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cheryl M. Reid whose telephone number is 703 305-0435. The examiner can normally be reached on Mon- Fri (7-4:30) 2nd & 5th Fridays off.
